Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 2-33, 35-37, 39-44, and 47-49 are pending in this communication filed 06/13/05 entered as Response to Election/Restriction and Request for Extension of Time.
2. The IDS filed 06/06/05 has been reviewed.
3. The prior restriction requirement in view of Applicants' convincing arguments is hereby withdrawn in view of a new ground(s) of rejection as set forth here below.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 47 and 2-~~32~~ are drawn to a method for aggregating information, receiving a specification of a class of items by a selected shopper, each enterprise offering items for exchange over a network, storing information about the items, responding to the specification of the class of items by the shopper, collecting information about a selected item, storing the collected information from the enterprises, and providing the information collected from the enterprises to a selected shopper, classified in class 705, subclass 26.

Group II. Claims 48, 49, 35-37, and 39-44 are drawn to a method for aggregating auction information from auction sites and searching for products or services offered for purchase by the auction sites, providing a host site in communication with the auction sites, storing information about the items it offers in an auction database and interacting directly with bidders, receiving a specification of a class of items by a selected bidder, responding to the specification of the class

of items by the bidder, searching the auction sites for items, collecting information about a selected item within the class from at least two of the auction sites, storing the information collected from the auction sites, and providing the stored information to a selected bidder, classified in class 705, subclass 37.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I has separate utility such as aggregating information, receiving a specification of a class of items by a selected shopper, each enterprise offering items for exchange over a network, storing information about the items, responding to the specification of the class of items by the shopper, collecting information about a selected item, storing the collected information from the enterprises, and providing the information collected from the enterprises to a selected shopper. The subcombination Group II has separate utility such as aggregating auction information from auction sites, providing a host site in communication with the auction sites, storing information about the items it offers in an auction database and interacting directly with bidders, receiving a specification of a class of items by a selected bidder, responding to the specification of the class of items by the bidder, searching the auction sites for items, collecting information about a selected item within the class from at least two

of the auction sites, storing the information collected from the auction sites, and providing the stored information to a selected bidder and the search for Group I is not required for Group II.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

7. Applicants' are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicants' are reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37CFR 1.17 (I).
